

# Digital Boarding Card

Do you have the experience of taking plane?

When you check in, you will receive a boarding card and it will show your status, flight number, boarding time and boarding gate etc., After you check in, the airport system only then receives the message that the flight is delay and you don't know about this so you go to the waiting room immediately. Perhaps you stare at the monitor and detect the boarding time is delay. But you don't find the crew to ask. You have to wait here patiently and also afraid that if you leave here, you would miss the flight.

Is the flight delay ?

Where is the crew ?

Could I leave here ?

How should I do ?

waiting room

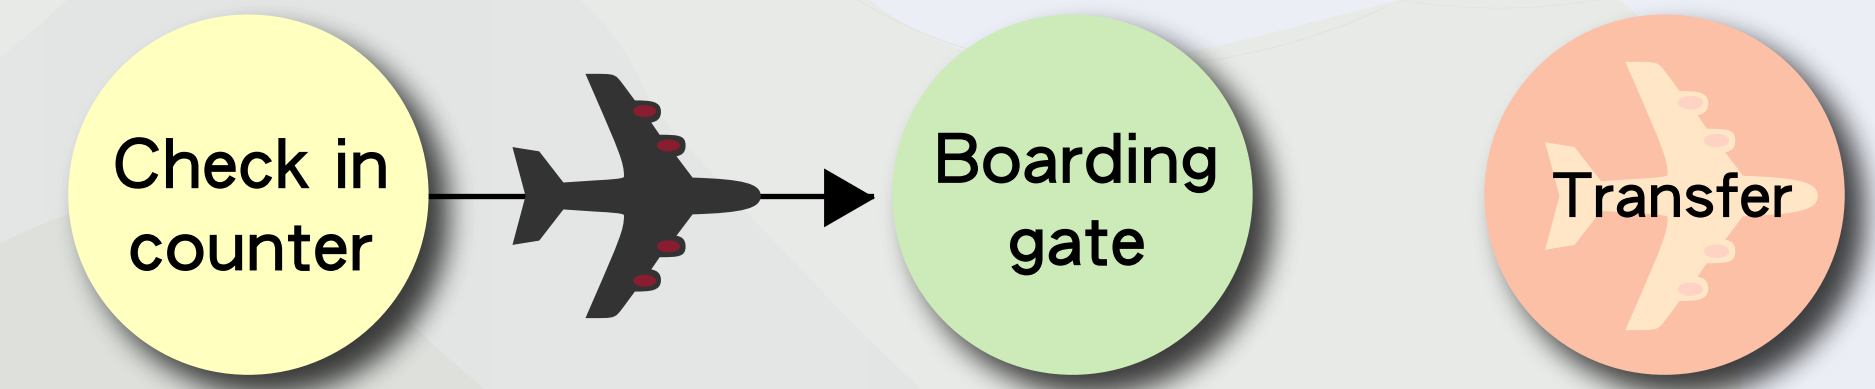

At the moment, a **Digital Boarding Card** can solve the above-mentioned problems.

## 2 situation:

2 situation you need the D-Card

Situation 1

Situation 2

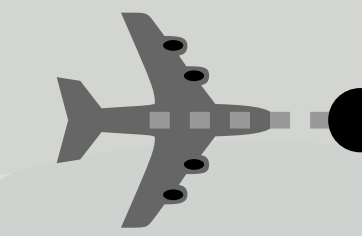

## 4 functions:

1.Plane's remark

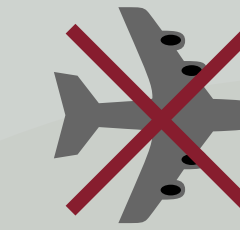

Remind timing

It can remind you how many time it takes between you and the gate.

Plane delay

Display the "delay" light signal and readjust the boarding time and the reciprocal time.

Plane cancel

Display the "cancel" light signal and it mean you did not on flight.

## 2.Direction

It can tells you the direction of boarding gate

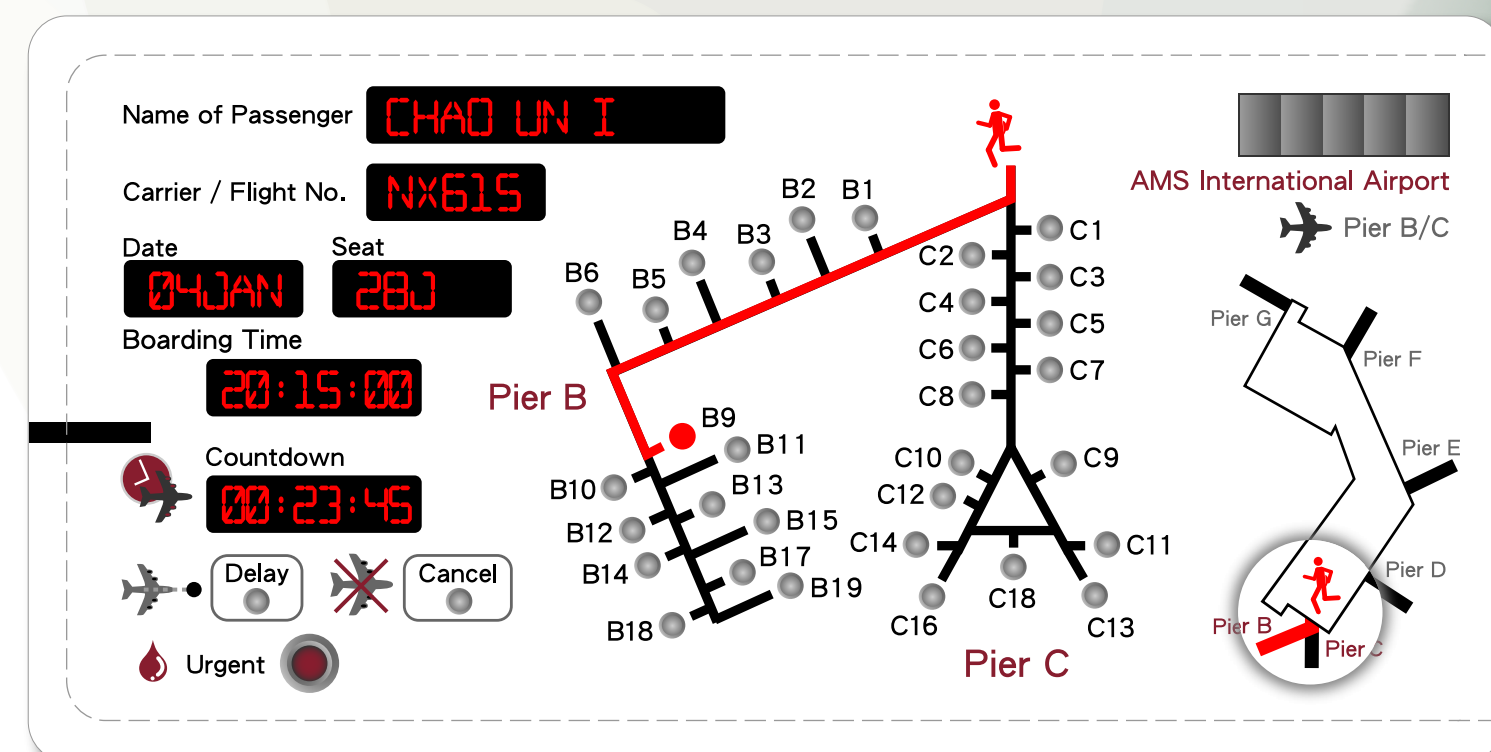

## 3.RFID

An RFID tag is an object that can be applied to or incorporated into a product, animal, or person for the purpose of identification using radiowaves. Some tags can be read from several meters away and beyond the line of sight of the reader. It is convenient to approaches your position.

## 4.Red alert

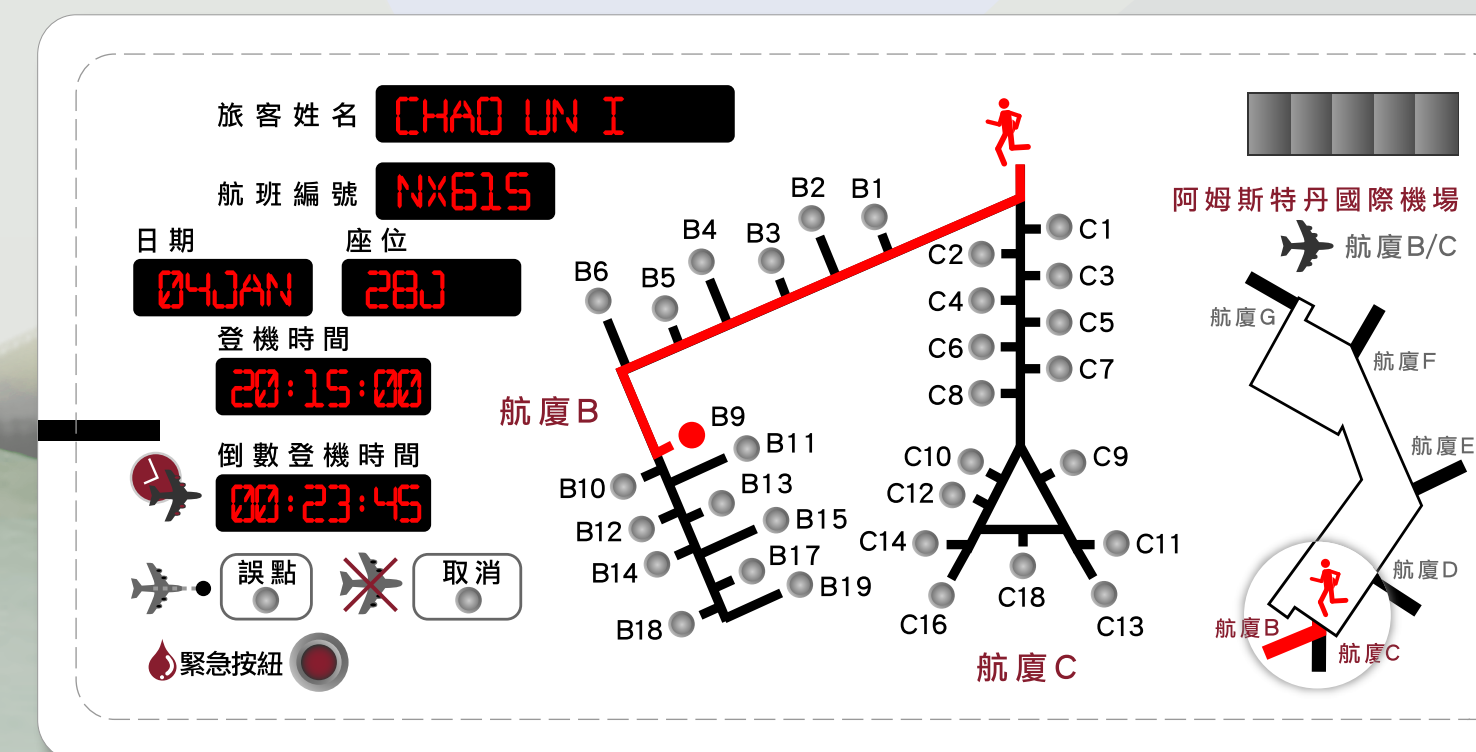

you can press the urgent button and the service will come to you immediately and try to help you.

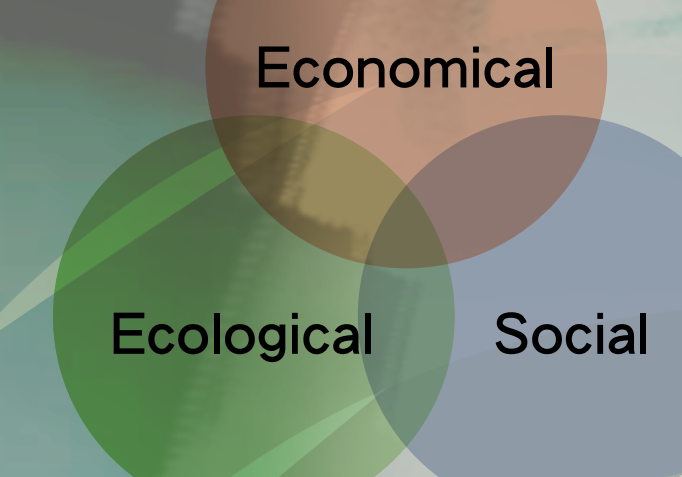

## 3 levels:

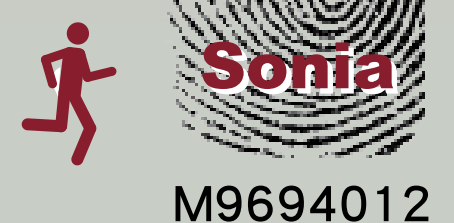

- Economical: It can repeat to use
- Ecological: Does not waste the paper
- Social: It can transform the language channel to English, German, Chinese, Japanese and French etc., it can use widely.

# Arrivals

I hope you'll have a nice trip.
